THE ADVENTURE OF A LIFETIME?

Join us!

We are the world's specialist in mobile broadband!

C++ Software Engineer

Nokia Solutions and Networks is the world's specialist in mobile broadband. From the first ever call on GSM, to the first call on LTE, we operate at the forefront of each generation of mobile technology. **In Poland, we are a leading telecommunications vendor** with extensive infrastructure and services organizations in Wroclaw, Cracow and Warsaw.

Nokia Solutions and Networks European Software & Engineering Center hires dedicated, enthusiastic and passionate people, who create the **largest ITC R&D in Poland**. Our facilities in Wroclaw are located in three sites and accommodate one of the **biggest test telecommunications labs in Middle and Eastern Europe**. Apply and experience the adventure of a lifetime!!!

Professional challenges and career opportunities:

We are looking for motivated software professionals for C++ Software Engineer positions. The challenges you will face include support of various software specification, developing, maintaining and testing processes.

We have a variety of opened positions for candidates with wide range of work experience – from fresh graduates to highly experienced professionals. You have to remember that the more experienced you are, the greater opportunities you have.

Position Description:

You will be a C++ Software Engineer working on a SW for Base Station. You will be a member of scrum team consisting of programmers, tester and specifiers. The team applies good development practices using e.g. STL, BOOST, Design Patterns, is responsible for requirements analysis, test cases design, implementation and execution. You will have an opportunity to constantly develop your skills in IT and Telecommunications domains. You will work in a flexible and friendly multicultural environment.

Position Requirements:

Must have:

Apart of solid **knowledge of C++ and deep understanding of Object Oriented Programming**, Candidate should have experience and knowledge of the following areas:

- **STL** containers and algorithms,
- **design patterns**,
- fundamentals of operating systems,
- **memory management in C++**,
- multithreading and synchronization mechanisms,
- **Linux console basics**,
- good communication in English (both written and spoken),
- readiness to relocate to Wroclaw.

Nice to have:

- **knowledge of agile SW development** practices,
- unite testing concept,
- knowledge of cellular and broadband **3G or 4G access technologies** (UMTS, LTE),
- professional work experience in above areas will be seen as a major advantage.

We can offer you:

- **competitive salary** + bonuses depending on one's achievements;
- medical care for you/your family;
- **flexible working time**;
- group life insurance;
- paid extended parental leave (up to 8 weeks);
- **relocation support**;
- co-financing of nursery and kindergarten;
- **multiSport card** (gyms, swimming pools, joga, fitness, etc.);
- tickets to cinema, theater, opera, e-ticket;
- **lunch tickets**.

Workplace: Wroclaw
