

Bombardier Transportation, a global leader in rail technology, offers the broadest portfolio in the rail industry and delivers innovative products and services that set new standards in sustainable mobility. BOMBARDIER ECO4 technologies – built on the four cornerstones of energy, efficiency, economy and ecology – conserve energy, protect the environment and help to improve total train performance. Bombardier Transportation is headquartered in Berlin, Germany, and has a very diverse customer base with products or services in more than 60 countries. It has an installed base of over 100,000 vehicles worldwide.

We are currently looking to recruit:

Production Test Engineer

Location: Katowice

Purpose of the job

The Production Test Engineer will be focused on Developing new Applications and Platforms for Production Test Equipment and additionally supporting existing Test Equipment in use for Bombardier Product Manufacture. This equipment is installed at both internal manufacturing sites and third party CEM manufacturing sites and is essential to ensure that Divisional products are delivered on time and to the required Quality. Working as part of a Global team the Engineer will also be responsible for Design for Test with the Product Design Authority for a wide range of Electronic and Electro-Mechanical Products.

Key responsibilities

- Develop Test Plans for a wide range of products from digital systems to Safety-Critical RF transmission units
- Specify, develop and commission key test equipment at Worldwide External and Internal Manufacturing sites
- Support existing test applications used in production to minimise production downtime
- Provide Design for Test feedback during the product development phase
- Develop supporting documentation including Test Instructions and system Manuals
- Evolve and improve Test Hardware Platforms, Software Frameworks and Development Processes.

Qualifications

- Technical University level education
- Relevant working experience min. 1 year
- Ability to develop requirements specifications for and fault find electrical and electronic hardware
- Ability to read electrical schematics
- Knowledge of software development tools and version control systems
- Good working knowledge of C# or C++ language
- Ability to travel to European and worldwide destinations 5 – 10 times per year.

We offer

- Participation in projects aimed at improving solutions which are used by millions of people daily all around the world
- Working with high-class professionals and gaining experience in a multinational organization
- Active involvement in working out your development and training plan
- Comprehensive benefits package (private medical care, group insurance, private pension plan, Christmas and Easter vouchers, Multisport card)
