

**CREATING
BETTER WAYS
TO MOVE
THE WORLD**

SAP PP (Senior) Business Analyst (m/f)

Requisition No. TGIS-DEBQ00711044a

With its headquarters in Berlin, Germany and with 63 production & engineering sites in 26 countries, 18 global service centres, and a rolling stock installed base exceeding 100.000 rail cars worldwide, **Bombardier Transportation** is the global leader in rail industry.

We cover full spectrum of rail solutions - from complete trains to sub-systems, maintenance services, system integration and signalling. We offer the broadest portfolio in rail industry while also being highly dedicated to delivering ingenious products and services for better and more sustainable ways to move the world.

Join us in changing the way people move around the world by applying for our exciting role:

SAP PP (Senior) Business Analyst

The position will be located in our **new IT Hub in Katowice (Poland)**, will be part of Group IS and will report to the Manager of ERP Operations.

We offer you the chance to **(re)invent mobility together** while also the once in a life time opportunity for an IT professional to **be part of a major IS / IT transformation project**.

SCOPE OF THE POSITION

The SAP PP (Senior) Business Analyst defines, delivers and standardizes IS business solutions and services to meet the business needs. The holder of the role is the key driver for application standardization and ensures quality of IT services.

KEY RESPONSIBILITIES AND CHALLENGES

Business Demand to Architecture

- Translate business requirements into IS/IT specifications, ensures completeness of system requirements and validates IS/IT architecture against requirements;
- Initiate projects including effort estimation in coordination with other IS/IT departments;
- Drive the definition and implementation of end-to-end solutions;
- Lead creation of functional design to develop standard SAP PP solutions and services;
- Definition & monitoring of business impact KPIs;
- Business interface role in regards with SAP PP solutions and services.

Solution definition and transition to service

- Drives the implementation, standardization, simplification and integration process of technologies considering the service roadmap;
- Develop strategies to build support for the change;
- Manage the end user adoption and business process support process;
- Ensure integration of SAP PP solutions across functions jointly with other IS/IT teams.

Innovation and continuous improvements of IS solutions and services

- Asses existing solutions against market trends and influences the roadmap accordingly;
- KPIs and SLAs definition and reporting to identify improvement potential;

YOUR EXPERIENCE & QUALIFICATIONS

- 5+ years of functional experience with/in deploying, change request management, end user adaption and training, and/or support of SAP solutions (SAP PP focus);
- Proven record of leading and/or being involved in several full-cycle projects in the field of Manufacturing ERP solutions (SAP PP focus);
- Strong functional knowledge preferably with several of the following modules: SAP MM, SAP WM, SAP eWM, Logistics and/or SAP SD;
- Expertise with mapping business requirements into IS/IT specifications (preferably within a global manufacturing business environment);
- Strong stakeholder management (at all levels), good communication & presentation skills;
- Willingness to travel 25 - 40% of the working time (mainly in our major European sites);
- Bachelor degree in IT, Business Administration or Economics; Excellent English while additional languages as German / French / Spanish / Italian will be a plus.

Why Work for Us?
